### Task #1 - Points: 1

Text: Reflect on the topics and refer to the checklist of this task

#### Checklist

\*The checkboxes are for your own tracking

#	Points	Details
<input type="checkbox"/> #1	1	Mention specifics of what concepts/topics were totally new to you.
<input type="checkbox"/> #2	1	Mention specifics of what concepts/topics you already knew.
<input type="checkbox"/> #3	1	Mention specifics of any topics you still don't feel confident about. If everything makes sense so far you can mention so.
<input type="checkbox"/> #4	1	At least a few reasonable sentences.

#### Response:

A concept that was new to me was the PHP syntax. It was a little difficult getting used to it as I've never worked with PHP before. However, the topics themselves were straightforward as I already knew about arrays, loops, and different data types. I still need to study more in depth about arrays in PHP as I felt the least confident about it. Overall, this was a good lesson as it taught the basics of PHP, which will be useful for server side scripting.
