Visit w3schools and go to the HTML Tutorial: <https://my-learning.w3schools.com/tutorial/mysql>
MySQL and RDBMS Fundamentals Lessons 1.1 - 1.3
Query Basics Lessons 2.1 - 2.8
Data Manipulation Lessons 3.1 - 3.4
Query Techniques Lessons 4.1 - 4.9
Advanced Queries Lessons 5.1 - 5.11
Database Management Lessons 6.3 - 6.15
MySQL Quiz at the end of the tutorial

Guide:

Make sure you're in the main branch locally and `git pull origin main` any pending changes
Make a new branch per the recommended branch name below (`git checkout -b ...`)
Fill in the items in the worksheet below (save as often as necessary)
Once finished, export the worksheet
Add the output file to any location of your choice in your repository folder
Check that git sees it via `git status`
If everything is good, continue to submit
Track the file(s) via `git add`
Commit the changes via `git commit` (don't forget the commit message)
Push the changes to GitHub via `git push` (don't forget to refer to the proper branch)
Create a pull request from the homework related branch to main (i.e., `main <- "homework branch"`)
Open and complete the merge of the pull request (it should turn purple)
Locally checkout main and pull the latest changes (to prepare for future work)
Take the same output file and upload it to Canvas
*This step is new since GitHub renders the PDF as an image the links aren't clickable so this method works better
*Remember, the github process of these files are encouragement for your tracking of your progress

Task #1 - Points: 1

Text: Reflect on the topics and refer to the checklist of this task

Checklist

*The checkboxes are for your own tracking

#	Points	Details
<input type="checkbox"/> #1	1	Mention specifics of what concepts/topics were totally new to you.
<input type="checkbox"/> #2	1	Mention specifics of what concepts/topics you already knew.
<input type="checkbox"/> #3	1	Mention specifics of any topics you still don't feel confident about. If everything makes sense so far you can mention so.
<input type="checkbox"/> #4	1	At least a few reasonable sentences.

Response:

A majority of the topics in the readings were relatively new to me as I've never worked with SQL before. I knew some topics such as Union and operators as we're currently going over it in another class I'm taking. I'm still having some trouble with the join keywords as they're a little complicated for me. However, the readings mostly helped me have a better understanding with MySQL and how databases work.
